1 Lack of Summary of Notes

To be frank, I already know this material (mostly from the course 40.001 *Probability*). I did input a lot of it into anki, but I'd rather not expend the effort to summarize basic probability rules if that's okay.

I'm fine dropping this summary as one of my lowest scores, and this drop won't be repeated. I don't know any of the other topics well enough that I'd want to skip doing the summary.
